

Applicant : Kimihiro Yamashita
For : METHOD FOR CONTROLLING ORGANISMS AND MATERIAL
THEREFOR, METHOD FOR SELECTIVE ADSORPTION OF
PROTEINS AND MATERIAL THEREFOR, CEMENT MATERIAL
AND BIOMATERIAL
Page : 2

Please add the following claims:

17. A method for controlling organisms according to claim 2, wherein the ceramic is powder, fiber or a coating film.
18. A material for controlling organisms according to claim 5, wherein the ceramic is powder, fiber or a coating film.
19. A material for controlling organisms according to claim 9, wherein the ceramic is powder, fiber or a coating film.
20. A cement material according to claim 12, wherein the ceramic is a material or a combination of materials selected from the group consisting of glasses and crystallized glasses which are materials selected from hydroxyapatite ceramics, barium titanate ceramics, strontium hydroxyapatite ceramics, hydroxyapatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics and calcium phosphate; stabilized and partially stabilized zirconia ceramics; ion conductive alumina ceramics; and piezoelectric ceramics containing lead.
21. A biomaterial according to claim 15, wherein the ceramic is a material or a combination of materials selected from the group consisting of glasses and crystallized glasses which are materials selected from hydroxyapatite ceramics, barium titanate ceramics, strontium hydroxyapatite ceramics, hydroxyapatite ceramics containing calcium or strontium as solid solutions, lithium niobate ceramics, sodium niobate ceramics, potassium niobate ceramics and calcium phosphate; stabilized and partially stabilized zirconia ceramics; ion conductive alumina ceramics; and piezoelectric ceramics containing lead.
